## IA60B31K - Current Transformer

Flexible, accurate, compact and reliable, those are the keywords of the IA-series of ELEQ. All transformers are equipped with a sealable integrated terminal cover. These - over the full operational temperature range - accurate current transformers are suitable for measurement and for revenue metering (billing). The accuracy is guaranteed from $0,1 \mathrm{VA}$ upwards. Therefor there is no need of using load resistors. For revenue metering: the serial number shown on the product is linked with unique measuring data available on our website. ELEQ provides isolated mounting clips which makes the IA-series suitable for mounting on rail or around cables.
